TECHNICAL SKILLS

Languages
TypeScript, JavaScript, PHP, Python, Dart, SQL, Java

Frontend
Next.js, React, Tailwind CSS, TanStack Query, Zustand, Three.js

Backend
Laravel, NestJS, Express, FastAPI, Flask, REST APIs, Sanctum / JWT

Data
PostgreSQL, PostGIS, Prisma, TypeORM, MySQL, MongoDB

Mobile
Flutter, Kotlin (Android)

DevOps & Quality
Docker Compose, GitHub Actions, Render, Vercel, PHPUnit, pytest

AI Engineering
AI-assisted development, Claude API integration, YOLOv8 vision

LANGUAGES

Kurdish Sorani	Native
English	Good

Rand Zana

Full-Stack Software Engineer

Laravel · NestJS · Next.js · React · PostgreSQL · Flutter

PROFILE

Full-stack software engineer who ships business systems end to end, from requirements and data model to API, interface, tests and deployment. I build platforms for local businesses, including a gym, a café and a two-campus school, with Laravel, NestJS, Next.js and PostgreSQL. Final-year Software Engineering student at Koya University; 2nd place, Zanko Award 2026.

EXPERIENCE

Freelance Full-Stack Software Engineer — 2025 – Present

Self-employed (RandVision) · Koya, Kurdistan Region

- Deliver complete systems for local clients: requirements with owners, data modelling, REST APIs, web and mobile UI, deployment and handover.
- **KF Gym:** built GymCore, the gym's operations and finance platform, plus a separately branded app for its women's gym.
- **Nali Café:** shipped the tablet-ordering, kitchen and accounting platform that powers the café's daily operations, live in production.
- **Private school client:** building a two-campus management system for a kindergarten and a K–12 school on my open-source school platform.
- Standardised every build on Docker Compose, PostgreSQL 16 and automated feature tests, with deployments on Render and Vercel.

Manager — 3 months

Dawan Company & Real Estate

- Managed daily operations, coordinated the team and handled client requests.

EDUCATION

B.Sc. Software Engineering — 2023 – 2027 (expected)

Koya University, Faculty of Engineering

SELECTED PROJECTS

GymCore — Gym Management Platform — Client · KF Gym

`Next.js 16` `React 19` `TypeScript` `Laravel 13` `PostgreSQL 16` `TanStack Query` `Docker`

- Members with body-metric history and WHO-banded BMI, courses with capacity and check-in, and memberships with freeze, renewal and auto-expiry.
- Finance engine that never trusts client-side money: server-side invoice totals, capped refunds, locked payslips, and P&L, receivables and MRR reports.
- Six roles enforced in API middleware across ~80 endpoints; a second branded app for KF Lady Zone via design tokens; Kurdish/English RTL.
- Service-layer business rules, 70+ feature tests, one-command Docker setup.

LEADERSHIP & AWARDS

Zanko Award — 2nd Place
Koya University · June 2026
Awarded for Zanko GreenLegacy, the AI-verified campus sustainability platform.

Team Leader, SmartSuli AI Hackathon
The Foundation, Sulaymaniyah · Sep 2026
Led a 5-person team building GreenLegacy Sulaimaniyah, a B2G platform linking citizens, businesses and recycling companies.

Leader, SOFTSPACE Group
Faculty of Engineering, Koya University · 2025–2027

CERTIFICATIONS

The Complete Python Bootcamp
Udemy · 2026

Web Development
Sololearn · 2026

Getting Started with Cisco Packet Tracer
Cisco Networking Academy · 2026

Introduction to ERP with Odoo
Koya Lab, The Foundation · 2025

Intro to Machine Learning · Intro to Programming
Kaggle · 2024

SQL Intermediate · Java Intermediate
Sololearn · 2024

Introduction to LLMs · Prompt Engineering
Sololearn · 2024

All certificates at **randvision.tech**

SELECTED PROJECTS (continued)

Café Management & Accounting Platform

Client · Nali Café

React 19 · Vite · Laravel 12 · PostgreSQL · Sanctum · Recharts · Docker

- Two portals: tablets at each table for self-ordering, and a staff dashboard with a live order queue for the kitchen and cashier, refreshed every few seconds.
- Inventory with stock movements, menu photos, per-item feedback and expenses, plus double-entry accounting with journals, statements and P&L.
- Kurdish/English with IQD pricing and a feature-tested API; live at **cafemanagement.randvision.tech**.

Dar Al-Iraq — Real Estate Platform

Koya · Web + mobile

NestJS · TypeORM · PostgreSQL · Socket.IO · Three.js · Leaflet · Flutter

- Listings filtered by price, type and bedrooms, with a Three.js 3D property viewer and a clustered Leaflet map of Koya's neighbourhoods.
- Agency back office for leads, deals, agents and expenses, pushed to every open screen in real time over Socket.IO; JWT auth, rate limiting and Helmet.
- Flutter companion app; Kurdish, Arabic and English with RTL; deployed on Render with Supabase Postgres.

School Administration & Finance System

Open source · GitHub ↗

Next.js 15 · TypeScript · Laravel 13 · PostgreSQL 16 · Zustand · React Query · Zod

- Student profiles, tuition and meal balances with discounts, overpayment prevention, transaction-safe invoice numbering and A5 PDF invoices.
- Book and clothing sales, expenses, teacher payroll, a returned-bill audit log and six report grids exporting to PDF and CSV; Sanctum auth with roles.

Zanko GreenLegacy · Zanko Award, 2nd place

Graduation project

Flutter · Flask · YOLOv8 · PostgreSQL + PostGIS · Claude API

- Students photograph litter; YOLOv8 counts the waste and grades it 1–5 on a staff dashboard map. Cleanups pass a verification chain (live video, QR sticker, same location, waste gone) before points are paid.
- Points ledger with fraud controls (24-hour hold, daily caps, trust scores), Google sign-in, email OTP and a Kurdish RTL Flutter app; 160+ pytest tests, including race-condition and fraud benchmarks.

Zankoline — University Admission Portal

Personal project

Next.js 15 · Express · Prisma · FastAPI · PostgreSQL 16 · Claude API

- Models Kurdistan's national admission system: students view exam results and rank department preferences, and a FastAPI service allocates seats with Gale-Shapley stable matching.
- Claude-powered admission assistant; Kurdish Sorani (RTL, default) and English via next-intl; JWT auth with Zod validation; four services in Docker Compose.
